CONTRACTORS BOARD LAUNCHES NEW MOBILE APP

HENDERSON and RENO, Nev. – The Nevada State Contractors Board has released a new version of its mobile application that makes verifying contractors' license information easier. The application is compatible with Apple and Android products and is available as a free download.

The application offers various license search features, including searches for contractors within a particular license classification or county, as well as license searches by business name, principal name, or license number. The license information available to the public includes the business contact information, classification type, status of the license, the license monetary limit, disciplinary history, bonding information, etc.

The mobile application is also a valuable tool for reporting unlicensed contracting activities. Users are guided to provide detailed information, which is then submitted to the Board's Enforcement Department for further investigation.

The new version seamlessly integrates with the Board's updated licensing and enforcement database, allowing users to retrieve current license status and reliable search capabilities. Those who had previously downloaded the Board's original application will need to download the application on their phones again to retrieve the most current version.

To download the free application for Apple products, visit the iTunes site:

<https://itunes.apple.com/il/app/nscb-mobile/id789876077?preserveScrollPosition=true#?platform=ipad>. Usage requires iOS 9.0 or later.

The app is optimized for iPhone 5.

For the Android application, compatible with operating system 4.4 and higher, go to Google Play:

<https://play.google.com/store/apps/details?id=com.imd.nscb>
